Work Experience

Livestack – San Francisco, CA

Fullstack Engineer | May 2020 – June 2020

- » Livestack provides creators and influencers a platform for hosting paid live streaming events
- » Revamped **React-based MVP** by implementing new user workflows and refining key touchpoints
- » Revamped form for requesting an event by implementing **conditional validation** on the front-end and enforcing schema requirements on the back-end
- » Developed **custom date picking component** to give users more flexibility when selecting dates
- » Refined key touchpoints by designing and implementing **updated visual styling and responsive layouts** for components, giving the end-to-end experience a more polished and professional look

Nuro – Mountain View, CA

Visual Designer | August 2016 – June 2019

- » Oversaw and executed design efforts across the company including branding, web, hardware/software UX design, photography, video, and mobile/VR prototyping
- » Planned and developed **virtual reality prototype** of first product with **Unity** and **C#**, designed the full end-to-end delivery experience to facilitate investment and partner discussions
- » Designed **touchpad interaction** on vehicle for users to quickly identify themselves and retrieve their items
- » Regularly partnered with software engineers to implement **user-friendly interfaces** for proprietary displays, internal tools, and prototype apps to facilitate partner discussions and company operations

Clearpath Robotics – Sunnyvale, CA / Toronto, ON (Canada)

Art Director | December 2015 – July 2016

- » Initiated and developed **new branding identity** for new division OTTO Motors and revamped logo for Clearpath Robotics, oversaw company transition to new branding
- » Directed the design and execution of the **new OTTO Motors website** for division launch
- » Explored and authored design guidelines for a new **dashboard user-interface design**

Intuitive Surgical – Sunnyvale, CA

Senior Visual Designer | February 2015 – December 2015

Visual Designer | February 2014 – February 2015

- » Designed and tested new visual status indicators for da Vinci Sp Surgical System, oversaw implementation into final product
- » Initiated and designed a new **interactive reference guide**, reducing setup time and errors during surgery
- » Executed **UI visual design updates** for da Vinci Xi Surgical System
- » Explored and composed **product brand guidelines** for da Vinci Xi Surgical System, and produced collateral for product launch
- » Introduced **user manual design**, identified opportunities to improve usability and readability, executed redesign, and integrated new design within Technical Publication's workflow

Clubcard – San Francisco, CA

Production Manager | April 2012 – February 2014

Production Assistant | April 2012 – May 2013

- » Supervised day-to-day design and print operations of the company
- » Consulted and designed high-quality custom promotional material for clients, facilitated printing and delivery for customers, and ensured client satisfaction with the final product
- » Investigated production errors and **refined procedures to prevent future mistakes**, reviewed new processes with team

Copyworld – Berkeley, CA

Graphic Designer | June 2007 – April 2012

- » Consulted and designed collateral for clients on a wide variety of print mediums
- » Oversaw up to a dozen design projects at once, often under tight deadlines
